EARLY BIRD SPECIAL
Register at least 30 Days in Advance
and Save Over 50% off the Course Fee
$199 Early Bird Special for 6 Credit Courses
$99 Early Bird Special for 3 Credit Courses
WHAT ARE CATEGORY 1 CORE COURSES?

In Ontario the new QA Program started on December 15, 2011 and requires at least 15 CE points per three-year cycle from Approved Category 1 Core Courses.

We are offering Category 1 Core Courses in 9 cities throughout Ontario during the next two years. Our courses are eligible for three or six Category 1 Core Credits.

OUR CORE COURSES ARE CATEGORY 1 APPROVED BY THE RCDSO QA COMMITTEE.
OUR COURSES ARE OFFERED IN MISSISSAUGA, OTTAWA, SUDBURY, THUNDER BAY, WINDSOR, KITCHENER, BARRIE, OSHAWA & ST. CATHARINES

COURSES ARE OPEN TO ALL DENTISTS.

There is a short multiple choice assessment at the end of the course which must be successfully completed to obtain your Core 1 credits

MANAGEMENT OF MEDICAL EMERGENCIES IN THE DENTAL OFFICE

Acute life threatening medical emergencies, although rare, can occur in a dental office setting. Emergencies can range from the anxious patient who experiences syncope to an acute life threatening anaphylaxis. Dentists must be prepared to recognize and respond appropriately to such emergencies.

This one day course will focus on the prevention, recognition and management of medical emergencies and complications in the dental office. Specific protocols to manage emergencies will be discussed. Pharmacology and mechanism of action of the emergency drugs required and mandated by the RCDSO will be reviewed.

The lecture will also focus on factors to help minimize the development of life threatening emergencies. These include a brief discussion of the medical history questionnaire and modifications to dental care to minimize medical risk.

COURSE OBJECTIVES

Briefly review aspects of pre-operative medical evaluation to help prevent the occurrence of medical emergencies

Recognition of patient distress

Provide specific algorithms to effectively manage medical emergencies

Review pharmacology of the six emergency drugs mandated by RCDSO
Dr. Ravi Vasudeva is a Diplomate of the American Dental Board of Anaesthesiology and is a specialist in Dental Anaesthesia with the Royal College of Dental Surgeons of Ontario. He received his dental degree from the University of Toronto and went on to complete a one year General Practice Residency at Rochester General Hospital, in Rochester, New York. He returned to the University of Toronto to complete his postgraduate training in the specialty of Dental Anaesthesia and currently teaches in the Dental Anaesthesia graduate program at the Faculty of Dentistry, University of Toronto. In addition, Dr. Vasudeva maintains a full-time referral-based specialty dental practice in Vaughan, Ontario. He lectures widely on topics of local anesthesia, oral and nitrous oxide sedation, medical emergencies in the dental office and other anaesthesia related topics.

Final venue location will be emailed to participants 30 days prior to course date.

Course fee is $595. Early Bird special is $199. Register at least 30 days prior to course to be eligible for Early Bird rates. All registrations must be confirmed via email by the Ontario AGD 30 days prior to the course date.

This course is eligible for six Category 1 Core credits upon successful completion of the course.

Ontario AGD is designated as an Approved PACE Program Provider by the Academy of General Dentistry. The formal continuing dental education programs of this program provider are accepted by AGD for Fellowship/Mastership and membership maintenance credit. Approval does not imply acceptance by a state or provincial board of dentistry or AGD endorsement. The current term of approval extends from 06/01/2011 - 12/31/2014.
DIAGNOSIS AND TREATMENT PLANNING IN PROSTHODONTICS

In this treatment planning course replacement of missing teeth will be discussed. According to the number and location of missing teeth treatment planning will be discussed for:

1. Fixed Partial Dental Prosthesis
2. Removable Partial Dental Prosthesis
3. Removable Complete Dental Prosthesis
4. Implant Supported Dental Prosthesis

Esthetic, biomechanical, periodontal factors that play an important role in choosing the type of prosthesis will be evaluated. Levels of treatment plan will also be considered.

Diagnostic evaluation of the case, periodontal considerations and selection of type of prosthesis will be included.

All above mentioned concepts will be discussed on clinical cases and interactive treatment planning will be performed at the end of the course.
Ontario AGD is designated as an Approved PACE Program Provider by the Academy of General Dentistry. This course is eligible for six Category 1 Core credits upon successful completion of the course.

---

**DR. HASAN ALKUMRU**

Dr. Hasan Alkumru is the Interim Head of Department of Prosthodontics and Director of Graduate Prosthodontics Program in the Faculty of Dentistry, University of Toronto and is a specialist in Prosthodontics with the Royal College of Dental Surgeons of Ontario. Dr. Alkumru received his DDS from Ankara University, Faculty of Dentistry. He did his PhD in Ankara University with the collaboration of Birmingham University, School of Dentistry, England and worked as a postdoctoral fellow in Birmingham University for 2 years. He has been lecturing for more than 25 years and is an internationally recognized speaker on Fixed Prosthodontics, Esthetic Restorations and Implant Supported Dental Prosthesis.

Dr. Alkumru has published more than 50 articles in International Dental Journals related to porcelain restorations, post-core restorations, implant supported restorations.

Recently he was given the First Year Teacher of the Year Award in the University of Toronto, Faculty of Dentistry.
Diagnosis of pulpal and periapical pathosis is a complex interpretation of signs and symptoms that is easily overlooked and underestimated when treating a patient that shows up with pain in the dental office.

This core course is designed to provide the scientific evidence and necessary tools to diagnose and plan the typical endodontic cases that might appear in the dental practice. Different clinical cases will be presented throughout the lecture which will be diagnosed and treatment planned with interactive participation of the audience.

At the end of the course the attendants will be capable to diagnose, evaluate, and decide with relative ease whether to treat or refer any case.

PART I - DIAGNOSIS

- Pulp-dentin biology
- Historical classification of Endodontic Diagnosis
- Current Diagnostic Classification
- Diagnostic Assessment
  - Pulpal Tests
    - Tests of supporting tissues
    - Diagnosis of cracks and longitudinal fractures
- Metrics for distinguishing pulpal and periapical pathosis

PART II – TREATMENT PLANNING

- Case selection
- Treatment Options
- Outcomes and Prognosis
  - Root canal treatment
  - Retreatment
  - Apical surgery
Dr. Aldo Manzur received his DDS from Carabobo University in Venezuela (2002) and his MSc in Endodontics from the University of San Luis Potosi in Mexico (2005); both occasions graduated with the highest honors. He has gained over 10 years of experience in teaching endodontics for Graduate and Undergraduate programs. He became a full-time lecturer and clinical instructor at the University of Toronto in 2005 and joined Western University as an Associate Professor in 2009. In 2012 he became a Fellow of the Royal College of Dentists in Canada in Endodontics.

Dr. Manzur served as Head of Endodontics at Schulich Dentistry from 2009 until 2012. He has dictated lectures and continuing education courses for the past 9 years around the American continent, including countries like Canada, Mexico, Costa Rica, Venezuela and Peru. Dr. Manzur has been recipient of national and international research, teaching and leadership awards. For the past 8 years has published in peer reviewed journals and has supervised graduate and undergraduate students research projects.

He is a member of the Canadian Academy of Endodontics (CAE), Ontario Society of Endodontics (OSE), and American Association of Endodontics (AAE).

Final venue location will be emailed to participants 30 days prior to course date.

Course fee is $595. Early Bird special is $199. Register at least 30 days prior to course to be eligible for Early Bird rates. All registrations must be confirmed via email by the Ontario AGD 30 days prior to the course date.

This course is eligible for six Category 1 Core credits upon successful completion of the course.

Ontario AGD is designated as an Approved PACE Program Provider by the Academy of General Dentistry. The formal continuing dental education programs of this program provider are accepted by AGD for Fellowship/Mastership and membership maintenance credit. Approval does not imply acceptance by a state or provincial board of dentistry or AGD endorsement. The current term of approval extends from 06/01/2011 - 12/31/2014.
The primary objective of this course is to provide participants with the skills necessary to access and apply the information needed to protect their health and safety when working with, or in proximity to, WHMIS controlled products.

This course meets the legislated worker training requirements for all federal workplaces and for provincial workplaces in all provinces and territories.

**WHO SHOULD TAKE THE COURSE?**

All workers that work with, or in close proximity to, a hazardous material must have WHMIS training.

**COURSE OBJECTIVES**

The primary objective of this course is to provide participants with the skills necessary to access and apply the information needed to protect their health and safety when working with, or in proximity to, WHMIS controlled products.

This course is presented in 6 modules:

1. Intro to WHMIS
2. Product Labels
3. Hazard Symbols
4. Material Safety Data Sheets (MSDS)
5. WHMIS Education – Responsibilities and Roles
6. Exemptions and Restricted Applications
Dr. Neil J. Gajjar lectures on managing medical emergencies in the dental office, has been a lecturer of oral pathology and clinical instructor at the Canadian Academy of Dental Hygiene, and has served as a clinical instructor in the Oral Diagnosis and Emergency clinics at the University of Toronto, Faculty of Dentistry. Dr. Gajjar is a Master of the Academy of General Dentistry, a Fellow of the Academy of Dentistry International, a Fellow of the Pierre Fauchard Academy, a Regent of the International College of Dentists and has served on both Disciplines and PLP Committees and as Councillor for the Royal College of Dental Surgeons of Ontario. He currently serves as a Clinical Examiner for the NDEB.

Locations & Dates

Mississauga  May 1, 2014  6:00pm – 9:30pm
Thunder Bay  September 18, 2014  6:00pm – 9:30pm
Windsor  November 13, 2014  6:00pm – 9:30pm
Ottawa  January 15, 2015  6:00pm – 9:30pm
Sudbury  May 28, 2015  6:00pm – 9:30pm

Final venue location will be emailed to participants 30 days prior to course date.

Course fee is $199. Early Bird special is $99. Register at least 30 days prior to course to be eligible for Early Bird rates. All registrations must be confirmed via email by the Ontario AGD 30 days prior to the course date.

This course is eligible for three Category 1 Core credits upon successful completion of the course.
1. CLINICAL ORAL PATHOLOGY REVIEW

This presentation is designed to provide the dental practitioner with a comprehensive review of what could be considered the most common oral lesions encountered in daily practice. Emphasis will focus on the clinical features of over 50 such lesions and appropriate management strategies where applicable. Relevant and current information concerning oral cancer will also be discussed including the expanding role of HPV involvement in the development of oropharyngeal cancer.

2. SPECIAL PATIENT CARE: THE MIND AND THE MOUTH: IMPACT OF PSYCHIATRIC ILLNESS ON THE INDIVIDUAL AND DENTAL MANAGEMENT CONSIDERATIONS

Psychiatric disease and dental disease are two of the most prevalent of all health problems that exist today. Mental illness and the resulting disabilities associated with these diseases inflict immeasurable difficulties on the patient as well as their family and friends, not the least of which remains the highly stigmatized nature of the disease itself. What really separates mental illness from other diseases is that it does not discriminate on the basis of age, race, economic status or gender.

One in five adult North Americans will suffer from some form of mental illness in any given year. A far greater percentage will not receive treatment until many years after the onset of illness. Depression will become the second leading cause of health impairment worldwide by 2020.(W.H.O.)

Every oral health care practice will include patients who suffer from one form or mental illness or another, even though many of these patients will appear healthy despite dealing with their on-going emotional disorder.

Mental health and oral health are intertwined and can significantly impact one another. Medications used to treat various forms of mental illness can interact with drugs used in dentistry. Oral health problems can arise as manifestations of mental illness as well as being side effects of numerous psychotropic medications. Psychiatric illnesses often lead to decreased compliance for preventive oral care and a decreased ability to obtain or tolerate dental care. The end result can be truly devastating, particularly for younger patients.

Mood disorders, schizophrenia, eating disorders, anxiety disorders, panic disorders, addictions and dementia will be highlighted. As well, there will a discussion around issues of abuse and the ramifications these will have for future mental health problems that in turn can impact directly on our delivery of dental care.
Dr. Clark is Clinic Director of Dental Services at Ontario Shores Centre for Mental Health Sciences in Whitby, Ontario, Canada (formerly Whitby Mental Health Centre) and is an Associate in Clinical Dentistry, Department of Oral Medicine, Faculty of Dentistry, University of Toronto. He obtained his MSc. in Oral Pathology at the University of Western Ontario in 1986 and is a Fellow of the Royal College of Dentists of Canada (2004), the Pierre Fauchard Academy (2008) and Academy of Dentistry International (2010).

His hospital-based practice is devoted primarily to the general dental care of individuals undergoing primary care for various forms of psychiatric illness often co-existing with other medically compromising conditions. He also participates in the teaching of the undergraduate dental curriculum relating to the topics of Oral Medicine and Oral Diagnosis at the Faculty of Dentistry, University of Toronto. He is is a part-time clinical instructor (Dental Hygiene, Year 2) at Durham College, Oshawa. He has lectured internationally since 2005 on the subject of psychiatric illness and its impact on the individual and dental management considerations.

**Dr. Clark is volunteering his time to teach this course and is not receiving any compensation.**

---

Ontario AGD is designated as an Approved PACE Program Provider by the Academy of General Dentistry. The formal continuing dental education programs of this program provider are accepted by AGD for Fellowship/Mastership and membership maintenance credit. Approval does not imply acceptance by a state or provincial board of dentistry or AGD endorsement. The current term of approval extends from 06/01/2011 - 12/31/2014.
This one day course is designed for general practitioners to gain knowledge and confidence in proper diagnosis, prognosis and risk assessment of periodontal patients. As more and more epidemiological studies are pointing to a link between oral inflammation (gingivitis) and chronic infection (periodontitis) with several systemic conditions it is pertinent that dental practitioners are able to devise a customized treatment plan and effectively apply various treatment modalities including non-surgical therapy, systemic & local antibiotics and surgical therapy.

Comprehensive management of complex patients require excellent diagnostic skills, enabling practitioners to apply correct periodontal therapy and also understand their limitations and when to refer patients. This course will also cover the indications and contraindications of various resective, regenerative, and plastic surgical procedures.

COURSE OBJECTIVES

1. Provide the participant with knowledge and confidence to recognize, diagnose and treat gingivitis and periodontitis with the best treatment modalities based on individual risk assessment.

2. Participants will learn the rationale to diagnose and select cases for advanced periodontal procedures to be incorporated into a comprehensive patient care model.

TREATMENT PLANNING BASED ON PERSONALIZED RISK ASSESSMENT

- Periodontal Examination - Healthy versus Diseased Periodontium
- Prognosis and Risk Factors
- Clinical Cases and Treatment Planning based on risk assessment and psychosocial needs of patients
- Diabetes and periodontal patients
- Tobacco smoking and periodontal patients
- Local and Systemic Antibiotics as an adjunct to periodontal therapy
- Integrated treatment planning and Perio-Restorative interaction
- Long-term maintenance of treated periodontal patient
Dr. Harinder Sandhu received his initial dental training from Guru Nanak University in India and his PhD in Anatomy in 1982 from the University of Ottawa. He received his Certificate in Periodontics in 1985 from Loma Linda University. He was supported by MRC of Canada during his pre- and post doctoral training. He joined Western in 1985 as a Career Scientist of the Ontario Ministry of Health and jointed the Faculty of Dentistry in 1987. He was promoted to the rank of full professor in 1998.

Dr. Sandhu has served as the Chair of the Periodontics Division, and the Chair of the Admissions Committee in Dentistry. He has held the position of Director and Associate Dean in Schulich Dentistry since 2004, two years as Acting Director and has recently been appointed as the inaugural Vice-Dean, Dentistry in the Schulich School of Medicine & Dentistry. He has also served as Chair of the Council of Deans (Dentistry) in Canada and President of the Association of Canadian Faculties of Dentistry.

Ontario AGD is designated as an Approved PACE Program Provider by the Academy of General Dentistry. The formal continuing dental education programs of this program provider are accepted by AGD for Fellowship/Mastership and membership maintenance credit. Approval does not imply acceptance by a state or provincial board of dentistry or AGD endorsement. The current term of approval extends from 06/01/2011 - 12/31/2014.
UPDATE IN PEDIATRIC DENTISTRY

BEHAVIOR MODIFICATION TECHNIQUES FOR THE PEDIATRIC DENTAL PATIENT

Utilizing slides, real-life anecdotes, and videotapes the participant will learn how to utilize various techniques to teach the patient that dentistry does not have to be fearful and can even be fun! The welcome letter and a computer-generated personalized book about going to the dentist are great beginnings for the first time patients. When to have parents in the operatory and how to utilize familiar objects will be illustrated. How to assess the child’s potential behavior will be taught. Radiographic techniques for children will be covered. Vocal intonation, mouthprops, body wraps, and rubber dam techniques will be reviewed. Various techniques for giving “painless” injections will be illustrated. Both pharmacologic and non-pharmacologic techniques will be discussed, including nitrous oxide sedation.

TRAUMATIC INJURIES OF THE PRIMARY AND PERMANENT DENTITION

Using patient’s photos, radiographs, and case histories, various types of traumatic injuries and their treatment will be reviewed. Involutions, dislocations, avulsions and the Ellis Classification of traumatic injuries will be discussed. Various radiographic techniques for hard and soft tissue injuries will be illustrated. The protocol for reimplantation of permanent incisors, including various splinting mechanisms will be covered. The dark primary incisor and treatment of trauma to primary teeth will be discussed. Pulp therapies of traumatically injured teeth will also be reviewed.

SPACE MAINTAINERS MADE SIMPLE

In this course the participant will learn the rationale behind the use of space maintainers. The participant will learn how to diagnose, the proper selection and fabrication of space maintainers. Proper space maintenance will be taught in a step-by-step approach so that the participant will be able to utilize the practical knowledge. Utilizing slides, models, and videotapes, the participant will learn how to diagnose, treat, prescribe to the laboratory, and utilize both removable and fixed space maintainer appliances.

KITCHENER COURSE IS CO-SPONSORED BY THE WATERLOO WELLINGTON DENTAL SOCIETY
Dr. Fred Margolis received his B.S. and D.D.S. from The Ohio State University and his certificate in pediatric dentistry from the University of Illinois College of Dentistry. Dr. Margolis was a Clinical Instructor at Loyola University’s Oral Health Center and an adjunct clinical assistant professor at the University of Illinois College of Dentistry. He has lectured for over 30 years and is an internationally recognized speaker on pediatric dentistry, laser dentistry and dentistry for the disabled patient.

Dr. Margolis has had articles published in both lay and professional journals. The subjects include pediatric dentistry, dentistry for the disabled, and laser dentistry. Fred has written a course manual “Beautiful Smiles for Special People” and is the co-author of the book Pediatric laser Dentistry: A User’s Manual, Quintessence, 2011.

He has been a Seminar Series lecturer for the American Dental Association and has recently been selected as a “top CE lecturer for 2013” by Dentistry Today. He is proud of the recognition awarded to him by the Illinois State Dental Society as the “Distinguished Member of 2005”, the Humanitarian Award from AGD in 2011 and the Meritorious Service Award by Alpha Omega International Dental Fraternity in 2011.

He is in full-time private practice of pediatric dentistry in Highland Park, Illinois.
